ENZYME ENGINEERING VOLUME 2

DOWNLOAD

Book Condition: New. Publisher/Verlag: Springer, Berlin | Considerable worldwide interest has arisen in recent years in the controlled use of enzymes as catalysts in industrial processing, analytical chemistry and medical therapy. This interest has generated the new interdisciplinary field of Enzyme Engineering, which includes both the scientific and technologic aspects of the production, purification, immobilization, and application of enzymes in a variety of situations and reactor configurations. A series of Engineering Foundation conferences on Enzyme Engineering was initiated to provide an international forum for the exchange of ideas and information over the entire range of this new field. The outstanding success of the first two conferences attests to the vigor and potential of this field to contribute significantly to a better understanding and resolution of some of the major problems faced by mankind. The first conference, which was held August 9-13, 1971, at Henniker, New Hampshire, U. S. A. , aided significantly in molding the several traditional disciplines that interact to form the field of Enzyme Engineering. The conference was highly successful mainly because many of the key scientists and engineers from the several facets of Enzyme Engineering were brought together for the first time at a single residential meeting. The result was an exchange of ideas and "education" of one another in the pertinent principles of the diverse disciplines which contribute to this field. The second conference, held August 5-10, 1973, at Henniker, New Hampshire, U. S. A. | Content.- Developments and Challenge of Enzyme Engineering.- 1973 Henniker Delphi Study.- Session I. Enzymes: Regulation and New Sources.- Stability of Enzymes from Thermophilic Microorganisms.- Polypeptide Hormones from Tissue Culture.- Design Consideration for Animal Cell Cultures as Sources of Enzymes.- Session II. New Purification Techniques.- Recent Developments in Enzyme Isolation Processes.- Protein Purification by Immunoabsorption.-...
