

## Applied Abstract Algebra with MAPLETM and MATLAB (Hardback)

By Richard E. Klima, Neil P. Sigmon, Ernest Stitzinger

Apple Academic Press Inc., Canada, 2016. Hardback. Book Condition: New. 3rd Revised edition. 235 x 156 mm. Language: English . Brand New Book. Applied Abstract Algebra with MapleTM and MATLAB(R) provides an in-depth introduction to real-world abstract algebraic problems. This popular textbook covers a variety of topics including block designs, coding theory, cryptography, and counting techniques, including Polya's and Burnside's theorems. The book also includes a concise review of all prerequisite advanced mathematics. The use of sophisticated mathematical software packages such as MapleTM and MATLAB(R) allows students to work through realistic examples without having to struggle with extensive computations. Notable additions to the third edition include expanded contemporary applications, coverage of the two-message problem, and a full chapter on symmetry in Western music. Several other parts of the book were also updated, including some MATLAB sections due to their adoption of the MuPAD computer algebra system since the last edition. This edition also contains more than 100 new exercises. This new edition includes the two most widely used mathematical software packages. It builds upon the successful previous editions, favored by instructors and students alike.
