

The EU Emissions Trading Scheme

Filesize: 8.49 MB

Reviews

The book is great and fantastic. It is written in straightforward words and phrases rather than difficult to understand. You won't really feel monotony at any time of your respective time (that's what catalogues are for regarding should you question me).

GRIN Verlag Okt 2013, 2013. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Neuware - Seminar paper from the year 2012 in the subject Politics - International Politics - Topic: European Union, grade: 1,0, University of Münster (Institut für Politikwissenschaft), course: European Environmental Politics, language: English, abstract: Due to ever mounting scientific evidence, today neither climate sceptics nor climate believers deny the fact that climate change is occurring and that human activity can be regarded as a prime cause. Uncertainty solely remains about the precise relationship between specific concentrations of particular greenhouse gases most importantly water vapour and carbon dioxide and changes in global temperatures. It is beyond doubt that certain gases in the atmosphere contribute to the so-called greenhouse effect by trapping heat. Human activity like burning carbon-based fuels, but also deforestation and ploughing is intensifying this effect and causing a constant rise in carbon dioxide concentrations. The growing empirical evidence for climate change triggered a global response, even though some authors classify it as meagre (Helm 2008). In 1992, 154 countries joined the United Nations Framework Convention on Climate Change (UN FCCC), to cooperatively consider what they could do in order to limit average global temperature increases and the resulting climate change. The UN FCCC built upon the Intergovernmental Panel on Climate Change (IPCC) established in 1988, an international scientific collaboration entrusted with the task to provide the world with a clear scientific view on the current state of knowledge in climate change and its potential environmental and socio-economic impacts (IPCC n.d.). The UN FCCC finally kicked off the process which culminated in the Kyoto Protocol, adopted in Japan on 11 December 1997 and entering into force on 16 February 2005. The Protocol commits 37 industrialized countries and the European...
